FLOW: 0.0022 cfs	FLOW: 0.0022 cfs OR 1.59 acre-feet
SOURCE: East Well Springs	SOURCE: East Well Spring
COUNTY: Tooele	COUNTY: Tooele COM DESC: Clifton
The point of diversion in polar coordinates: S 55 deg 52' E 7274.0 ft from NE Cor. Sec. 25, T8S, R18W, SLB&M.	The original spring source was sealed during the spring floods in 1985. Since that time the spring has resurfaced at the new point of diversion. This opinion is based on data supplied by the District Geologist. The original spring flow was significantly less than at the new source. It is the opinion of the District Geologist that the original spring was losing water to a fault which was sealed by the land slides. The flow was measured Apr 26, 1991 using a stop watch and one gallon bucket.
